

Penetration Tester & Developer

We are looking for a white hat penetration tester. Their key responsibilities is to fortify all levels of our infrastructure from unwanted intrusions and protect the company with internal controls.

Key Skills

- JavaScript
- In depth ECDSA knowledge
- SSH/https/certificate knowledge
- Previous penetration testing experience
- Experience with CloudFlare and other services to prevent DDOS attacks
- A solid understanding of multisignature bitcoin transactions
- Able to perform a MITM attack with faked certificates
